

## Artwork Guidelines for CD Duplication Only

The following information was created to assist you and your graphic designer with the creation and preparation of your artwork files. Please take a moment to review our artwork preparation guidelines and specifications.

### IMPORTANT

Artwork that is not prepared to our specifications can increase your lead-time and result in additional costs. You can down load templates [here](#).

For CD Replication and Printed Packaing (Higher Quantity), please [click here](#) for your artwork guidelines.

CD Duplication 4 Less utilizes high quality Thermal imprinting and full color LaserJet label printing for our CD Duplication process.

Thermal imprinting is available in Black, Blue and Red colors and is smudge-proof and scratch resistant. Label printing is Full Color and can be smudged with heavy wear or by liquid on the label surface.

All printing is done directly from electronic files, thus no film costs.

## DISK FORMATS

CD-R  
3 ½" Floppy

We can accept both Mac and PC formats.

## File Types

Please save your file as a high resolution TIF or JPG image.

DO NOT save the file with the template layers in the image. Otherwise the rings of the template will print on your art.

For Thermal imprinting: Halftones and screens will print, but we suggest using these sparingly as the quality is not as accurate as traditional silkscreen printing or label printing.  
NO FULL Floods on Thermal imprint!

For Label printing: Halftones, screen and floods print well.

Keep all fonts larger than 6 pt.

## E-mail and FTP File Guidelines

We can accept e-mail files of 1MB or smaller.

For larger files, please use our FTP interface.

**NOTE:** Please notify us by e-mail [upload@cdduplication4less.com](mailto:upload@cdduplication4less.com) when you have uploaded your art files. We check for FTP files only when we have been advised to do so.

## Shipping Information

Please ship your electronic art files on disc to:

**CD Duplication 4 Less  
9001 Fullbright Avenue  
Chatsworth, CA 91311  
800-982-8138**
